

The screenshot displays the IBM Watson IoT Platform interface. At the top, there's a navigation bar with the IBM Watson IoT Platform logo and user information (nagalakshmi@ibm.com, ID: g7jvr). Below this is a breadcrumb trail: Browse > Action > Device Types > Interfaces. A blue 'Add Device' button is in the top right. The main heading is 'Browse Devices'. Below it are two buttons: 'All Devices' (selected) and 'Diagnose'. A paragraph explains that the table shows a summary of all devices added, which can be filtered, organized, and searched. Below this is a table with the following data:

Device ID	Status	Device Type	Class ID	Date Added	Descriptive Location
123	Disconnected	Nagalakshmi	Device	Nov 15, 2022 12:45 PM	
12345	Disconnected	abcd	Device	Nov 15, 2022 3:19 PM	

A modal window is open for device 12345, showing tabs for Identity, Device Information, Recent Events, State, and Logs. The 'Device Information' tab is active, displaying 'Device ID' and '12345'. A status message at the bottom right says '0 Simulations running'.
